About

Just another code monkey looking to broaden his skillset and horizons, preferrably outside of North America. Prefers fitness balls over fancy chairs, and better to know in person than on paper (or screen)

Work

I met the CTO at Fetch Auto 5 years ago as an intern at Pulse Energy and have been pretty inseparable until now

It's time to strike it out on my own though — he got me to come back and work with him not once, but twice, and I'm looking for a place where I can settle down and build similarly close working relationships

Ask me about how I ended up learning Italian on the job, my cadrés of co-op students, or when! almost brought down a busy test environment as an intern

Fetch Auto

February 2017 to May 2018

Senior Software Developer

Got called back to Vancouver while travelling abroad by my former team lead at Yardi to become the first employee at Fetch Auto, the only end-to-end solution for Canadians to buy, sell and finance private sale vehicles

- Took a UI prototype to a production application in less than 6 months
- Rapidly iterated on new features and designs to drive user growth

Yardi Energy | EnerNOC | Pulse Energy

June 2014 to September 2016

Software Developer

Returned to Pulse Energy as a new grad in Summer 2014 looking to broaden his horizons – by 2014's end we were acquired by EnerNOC, and then in Summer 2016 sold off to Yardi

- Mentored and developed co-operative education students
- Led a year-long, platform wide internationalization effort

Pulse Energy

January 2013 to August 2013

Software Developer (co-op)

I cut my chops at a mid-size start-up that gave utilities and energy retailers' an unrivaled understanding of their commercial and industrial customers, and helped dozens of utilities such as British Gas, PG&E, and BC Hydro to transform their businesses with energy intelligence

- Built out a service oriented node.js platform atop a legacy Java monolith
- Designed, prototyped and delivered single page, user facing web applications

Skills

I'm more or less a full stack

Ask me about my soft skills –

Front end

- ES6
- react
- redux
- i18na11v
- User analytics

Back end

- node.js
- Data architecture
- Serverless computing
- Performance tuning
- Microservices
- i18n

Operations

- AWS
- CloudFormation
- Chef
- Configuration as code
- Network security
- Fault tolerance

Education

I went to school on top of a mountain for 5 years

I remember some things better than others, like the snow days. For everything else there's

Simon Fraser University

Bachelor's degree

Highlights

- CMPT 470 Web Information Systems
- CMPT 431 Distributed Systems
- CMPT 305 Computer Simulation and Modelling
- POL 451 Public Policy Analysis

September 2009 to April 2014

Computing Science & Political Science
