

Work

I met the CTO at Fetch Auto 5 years ago as an intern at Pulse Energy and have been pretty

It's time to strike it out on my own though — he got me to come back and work with him not once, but twice and I'm looking for a place where I can settle down and build similarly

Ask me about how I ended up learning Italian on the job, my cadres of co-op students, or when I almost brought down a busy test environment as an intern

Fetch Auto

Senior Software Developer

February 2017 to June 2018

Got called back to Vancouver while travelling abroad by my former team lead at Yardi to help build out the first end-toend solution for Canadians to buy, sell and finance private sale vehicles

- Took a UI prototype to a fully integrated, production application in less than 6 months
- Rapidly iterated on new features and designs to drive user growth
- Implemented a comprehensive user tracking & analytics platform
- Designed and developed a serverless service platform
- Got asked to be their first employee while passing Sardinia on a container ship

Yardi Energy | EnerNOC | Pulse Energy

June 2014 to September 2016

Software Developer

Returned to Pulse Energy as a new grad in Summer 2014 looking to further grow my skillset – by year's end we were acquired by EnerNOC and then in Summer 2016 sold off to Yardi

- Mentored and developed co-operative education students
- Led a year-long, platform wide internationalization effort
- Dove deep in support of a platform wide localization effort into Italian
- Designed a centralized, platform wide notification and subscription workflow
- Visited the office and found that much of the code I wrote was still running untouched and error free

Pulse Energy

January 2013 to August 2013

September 2009 to June 2014

Computing Science & Political Science

Software Developer

♠ https://pulseenergy.com

dro an understanding of their

I cut my chops at a mid-size start-up that gave utilities like British Gas, PG&E and BC Hydro an understanding of their commercial and industrial customers while serving up actionable energy intelligence for small, medium and large businesses alike

- Built out a service oriented node.js platform atop a legacy Java monolith
- Designed, prototyped and delivered single page, user facing web applications
- Scalably configured applications, services and servers via Chef
- Learned how much a little bit of free food served at the right time can keep spirits high

Skills

I'm more or less a full stack

Education

Ask me about my soft skills –

Front end

- ES6
- reactredux
- i18n
- a11y
- User analytics

Back end

- node.js
- Data architecture
- Serverless computing
- Performance tuning
- Microservices
- i18n

Operations

- AWS
- CloudFormation
- Chef
- Configuration as code
- Network security
- Fault tolerance

Simon Fraser University

Bachelor's degree

Highlights

- CMPT 470 Web Information Systems
- CMPT 431 Distributed Systems
- CMPT 305 Computer Simulation and Modelling
- POL 451 Public Policy Analysis

Interests

Auto racing

- WEC
- WTSC
- F1
- IndyCar

Photography

- Landscapes
- Night
- Long exposures
- Events
- Weddings

- Food & drink

 Comfort foods
- Baked goods
- Iced beverages
