If you think I'm being a little silly here it's because I take my actual work pretty seriously. If you're the type to hammer out whiteboard problems with a beer in hand or refine project requirements splayed out on the couch playing with dogs, get in touch - I'm sure we'll get along just fine

Smunch

Senior Software Developer

March 2019 to Present

I wanted a taste of adventure after living and working in Vancouver for so long and opted to join the one Berlin startup trying to spice up lunch in the workplace

- Lead the rebuild of our core frontend application, increasing mobile engagement from 2% to 34%
- Re-architected our backend onto AWS Lambda, cutting our API response times by more than 50%
- Building a technical culture driven by continuous improvement and tight, meaningful feedback cycles
- Inspiring and facilitating a design and decisioning culture centred on understanding user behaviour, from broad aggregates to watching every mouse click

Fetch Auto

Senior Software Developer

February 2017 to May 2018

fittps://www.fetchauto.ca

Got called back to Vancouver while travelling abroad by my former team lead at Yardi to help build out the first end-toend solution for Canadians to buy, sell and finance private sale vehicles

- Took a UI prototype to a fully integrated, production application in less than 6 months
- Rapidly iterated on new features and designs to drive user growth
- Implemented a comprehensive user tracking & analytics platform
- Designed and developed a serverless service platform
- Got asked to be their first employee while passing Sardinia on a container ship

Yardi Energy | EnerNOC | Pulse Energy

June 2014 to September 2016

Software Engineer

♠ https://pulseenergy.com

Returned to Pulse Energy as a new grad in Summer 2014 looking to further grow my skillset - by year's end we were acquired by EnerNOC and then in Summer 2016 sold off to Yardi

- Mentored and developed co-operative education students
- Led a year-long, platform wide internationalization effort
- Dove deep in support of a platform wide localization effort into Italian
- Designed a centralized, platform wide notification and subscription workflow
- Visited the office and found that much of the code I wrote was still running untouched and error free

Skills

Education

han others, like the sno

everything else th

Front end

- **ESNext**
